VIRTUAL REALITY ENDOSCOPY

MÁLAGA y MADRID, October 26th 2021

Endorsed by:

VIRTUAL REALITY ENDOSCOPY

Tuesday October 26th 2021

Live streaming meeting about advanced 3rd space endoscopic therapy in which a broad spectrum of the **most complex and innovative interventional endoscopic techniques** are covered.

Virtual Reality technology designed for the event and Telefónica's 5G network come together to offer the professional an absolute immersion in the procedures carried out anywhere in the world.

COURSE DIRECTORS:

Dr. Pedro Jh. Rosón Rodríguez

Head of Gastroenterology Department at Hospital Quirón Salud Málaga.
IEDA Director.
Board Member Spanish Endoscopy Society.

Dr. Francisco Manuel Fernández Cano

Gastroenterology Department at Hospital Quirón Salud Málaga.

Dr. Eduardo Albéniz Arbizu

Endoscopy Unit at Complejo Hospitalario de Navarra.
Navarrabiomed research center /UPNA/IdisNA Pamplona.

VIRTUAL REALITY ENDOSCOPY

Tuesday October 26th 2021

WHAT ARE WE GOING TO DO?

Thanks to 5G technology and Virtual Reality, we are going to connect the endoscopy room of the Quirón Málaga Hospital with the Telefónica auditorium in Madrid. Moderators and physicians attending the event in Madrid will be able to "transport" themselves to a virtual operating room and attend virtually and directly to the “live” endoscopy procedures in Málaga. They will have a full 360 view of the room and direct voice communication without latency with the experts who are performing the advanced endoscopy cases. They will also have virtual screens with different multimedia sources, so no details of the operation will be lost.

All this will be possible thanks to autonomous 5G VR devices, which will allow maximum freedom to interact remotely with endoscopy rooms.

It will also be possible to follow the event from anywhere: When registering for the event, virtual reality glasses will be sent to the participants to connect to the live experience with their own mobile phones. This way, everyone could see the future of endoscopy.

We really believe that you have never seen something like this ... Do not miss it!
